### Coleman Violin Pupil's Outstanding Success

Youngest Daughter of Mr. and Mrs. Sam Moores Wins With Highest Marks.

The following letter received by Elizabeth Moores, aged 13 years, and a pupil of W. J. Harris, will be read with interest. It was sent to her by the principal of Toronto Conservatory of Music:

Toronto, July 25.

An analysis of the markings in connection with our 1929 examinations for Toronto and throughout the Dominion, including both mid-winter and mid-summer examinations, reveals the fact that you have scored the highest number of marks awarded this season to any candidate in our introductory violin examinations. You are, therefore, entitled to the Conservatory's introductory school violin silver medal, which will be forwarded to you in due course.

I desire to congratulate you and your teacher on your well-deserved success, and trust that your musical studies may proceed as satisfactorily in the future as during the season which recently came to a close.—Ernest MacMillan, Principal.

### CAR BADLY SMASHED

While driving to the North Fork on Sunday to the competition of the Coleman Rod & Gun Club, a new Ford car owned by E. Gudmundsen was badly smashed. A blow-out on the left front tire caused the driver to lose control, with the result that the car went into the ditch and turned over, completely wrecking the top, but the car was brought back under its own power to Coleman. The occupants were badly shaken, and one man, J. Lardinois, was slightly injured. There was no accident insurance on the car.

### APPRECIATED PROMPT RESPONSE

In appreciation of the services of the fire brigade last Thursday evening, Alex. M. Morrison sent them a cheque for \$25 next morning, with a letter expressing his thanks for their good work. The members thank Mr. Morrison for his tangible expression of appreciation.

Wm. Hall of Drumheller, formerly mine surveyor at McGillivray mine, and Dr. Johnson, spent Friday night, in town on their return from a trip to the Pacific coast.

### BUMPED THE PUMP

When making the turn at the corner by Coleman garage last Thursday evening, R. Laslett's car just grazed the gasoline pump at the edge of the sidewalk. It knocked it over, and immediately a mass of flame shot up, enveloping the car for a moment, but Mr. Laslett backed out and so avoided damage. The electric wires in the pump used for illuminating it short circuited, causing the fire. The fire brigade turned out very quickly, and one good shot from the hose extinguished the blaze. The absence of wind prevented the fire from spreading to the buildings, though considerable apprehension was felt for a few minutes that the heat would cause an explosion in the main tank below the sidewalk. An amusing sidelight of the incident was that Summit Lodge, A.F. & A.M., were holding their regular meeting in a building opposite, when Mayor Burns, tyler of the lodge, suddenly opened the door of the lodge room and told the members they had better call it off, as there was a house of fire down below. That's one time the lodge did not call off in due form.

### Local News

Mrs. J. O. C. McDonald entertained a few ladies on Thursday afternoon last.

Adeline Duffield is spending two weeks' holidays in Lethbridge with Margaret and Myrtle Dougall.

Mrs. J. Burns of Vancouver is visiting at the home of her daughter, Mrs. James, for a month.

J. B. Cleary, representing the Louis F. Dow Co., while here on Friday, visited an old friend in the person of H. McLeod.

Mr. and Mrs. H. C. McBurney are spending their vacation at Waterton Lakes, where they have rented a cottage.

Miss Gladys Lees, of Tull & Arden's offices, Lethbridge, is spending two weeks' vacation with her parents here.

Mrs. Powell and daughter, Mrs. Carson, spent Tuesday in Fernie, driving up with Mrs. McAulay, who intends spending a month there.

Mr. and Mrs. Fred Antrobus left on Sunday for two weeks' holiday, travelling by car, and they intend to return on Aug. 16.

### PRIZE-WINNING PUPILS DISTINGUISH THEMSELVES

John Petrovski, Elizabeth Moores (back), Olga Belevich, Alfred Moores. All passed with first-class honors in Toronto Conservatory of Music Exam, and are pupils of Mr. W. J. Harris, of Coleman. Elizabeth Moores was awarded highest marks in the Dominion for Introductory exam, in violin. Two thirds of Mr. Harris' pupils were awarded honors. Kenneth Owens of Natal, was awarded highest marks at Coleman centre for violin. Coleman pupils included Tom Hill, honors; John Van Maarian, 1st; Jenny Michalsky and Phyllis Shone, pass.

### Local News

Mr. and Mrs. W. L. Rippon have rented a cottage at Waterton Lakes for three weeks' holiday. P. W. D. Stopford of Lethbridge branch will be acting manager in the bank here.

Miss Edeline Duffield of Coleman is spending two weeks' holidays in Lethbridge, the guest of Margaret and Myrtle Dougall.—Lethbridge Herald.

In recognition of Blanche Higginbotham selling the largest number of tickets on the Chesterfield suite for the carnival, she was awarded a special prize of \$500 by H. C. McBurney, president of the carnival committee.

Marjorie Halliwell returned on Saturday from a month's holiday at Weyburn and Carlyle Lake, Sask., and was accompanied on her return by an old school chum, Vera Ingram, of Estevan.

Coleman Rod & Gun Club held their second competition of the season on Sunday at North Fork, 29 members making the trip. Biggest bag was won by Thos. Jackson, biggest trout by William McCulloch, biggest hull trout by Albert Fauville. The weather contributed to the success of the day, though the catch was not large.

Capt. Robert Dollar, one of the wealthiest of American showmen, gives some excellent advice to those who have been waiting for their ship to come in. "Never wait for your ships to come in," he says, "I send mine out. The ships will come in all right as long as you keep sending them out."—Christian Science Monitor.

E. D. Battrum, auditor, of Calgary, was here on Tuesday afternoon on the town audit, and proceeded west to spend a vacation with his family in Vancouver.

### Drowned Whilst Fishing

Allan Briggs, aged 16 years, son of the assistant forest ranger in Castle mountain district, was drowned on Friday afternoon in the south fork of Carbondale river, at the falls. The body was found on Sunday by his father and forest ranger Jack Standish in one of the deep holes near the falls. It is thought that he was either stunned by the heavy electrical storm which passed over the district or slipped off a rock whilst fishing. He could not swim.

### Coleman Team Second in First Aid Competition

The first aid team which competed last May in the Wallace Nesbitt competition, was composed of H. Dunlop, captain; A. Balloch, Jim Consius, Melvich Cornett. Advice received this week from Col. Hodgetts, director general of the St. John Ambulance Association, Canadian branch, informed the secretary, J. M. Rushton, that Coleman had won second place in the Nesbitt competition. Fourteen teams in various parts of the Dominion were registered.

### Notice to Unemployed

All unemployed men, married or single, should leave their names with D. Gillespie at the K of P. hall, which will be open in the evenings.

H. McLeod, master mechanic at McGillivray mine, left for Merco last week. It is reported that he has been appointed manager of the coal company there in succession to J. Crawford, formerly superintendent at McGillivray mine here.

### FLAG PLANTED ON TOP OF "THE CROW"

Steve Janostak Proudly Proclaimed His Success by Hoisting Flag on Highest Point.

A white flag flying on the topmost crag of Crow's Nest mountain on Sunday denoted that another successful ascent had been made. The climber was Steve Janostak, who dragged up the heavy pole from the timber line together with the large white sheet which he hoisted about 5 o'clock Sunday afternoon, and which could be seen quite plainly with field glasses from the town or from any part of the surrounding country for miles.

His father and mother started with him, but found the ascent so arduous that they gave up before reaching the famous gulch or "chimney" which in itself is a very hard climb. Steve went on with his collie dog for company, and almost two hours after climbing the gulch he was at the top and planted his flag. This is his second climb of the "Crow."

Between five and six hours was taken to climb from the base to the summit, and he returned to town shortly after 10 o'clock, being given a lift back by a friendly motorist. He stated that the wind made the climb difficult, as the flagpole he was carrying was continually swung around by the wind.

### DOUBLE-HEADER BASEBALL AT NATAL

A double-header baseball event is announced to take place at Natal park on Sunday, Aug. 18. First game at 1:30 p.m. will be Natal-Michel vs. Kimberley, and second game Natal-Kimberley all stars (pick of the district). Admission to each game is 25c.

### Boys Guilty of Breaking The Fishing Laws

Court Action Will Be Taken if Offences Against Laws Continue.

Serious complaints are being made by older fishermen of boys who are fishing in forbidden creeks, and flagrantly breaking the laws. On Sunday five boys were caught snaring fish with copper wire in the Old Man river near Sentinel. The man who caught them gave them warning that if caught again they would be taken into court. They had a sugar hag half filled with fish. Forest Ranger Houston has been on the lookout for those breaking the law, and if these breaches are continued there will be a number of boys brought before the magistrate and fined. Another offence which is punishable is the taking of fish less than nine inches long. These must be returned to the river if hooked.

### Local News

Use the Classified Advt. columns to advertise houses for sale or rent, or articles for sale. Minimum charge is 35c; rate of 2c per word.

Andrew Salmela and family left last week for Vancouver to live. He sold his house on Edith street to E. W. Beart, who has moved over from West Coleman.

Mr. and Mrs. Alex Muir, Miss Mercer and Miss Kathleen Davidson, of Alexco, visited here for a few days, on their return from a trip to Vancouver, going by the main line and returning via the Kettle Valley line of the C.P.R.

### The Sportsman's Paradise

PROTECT IT AGAINST FIRE

Green forests ensure an even flow of clear running water; burned timber means muddy torrents in flood time and stagnant pools in dry weather.

The good sportsman, in his own interest, is careful with fire in the woods.

Issued by authority of  
Honourable  
Charles Stewart,  
Minister of the Interior.

## Notice Re Hospital Service

Tradespeople and people engaged outside of the mining industry may receive the benefit of hospital rates of \$1.50 per month or \$4.50 per quarter, payable in advance. This entitles them to hospital accommodation in case of sickness. Medical attendance is not included in this rate. Apply to Percy H. Locke, Secretary, Box 4, Coleman.

WORLD HAPPENINGS  
BRIEFLY TOLD

Lady Jane Moreton, mother of Lady Byng, died at Brighton, England, very suddenly at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Ducie, who died in March, 1927.

William Johnson, a powder monkey when the last shots were fired in the Crimean War, and a witness of the last hanging for naval insubordination, died recently at Weymouth, England, aged 85.

The British Admiralty has announced promotion of Admiral Sir Osmond Brock to be Admiral of the Fleet, to fill the vacancy caused by transfer of Admiral Sir Charles Madden to the supplementary list.

Concealed among the ship's paint supplies, which are stored in the forepeak, 108 tons of opium valued at \$10,800 were seized by customs examiners on board the "Empress of Asia," of the Vancouver-Orient service. No arrests were made.

A sale of 62 imported cattle by B. H. Bull and Son, at their farm near Brampton, Ont., brought total receipts of \$80,224. It is said the sale was the largest of Jersey cattle ever held in Canada and the average price of \$1,293 has never been equalled on the continent since 1920.

Official circles have indicated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building suspensions announced by Premier Ramsay MacDonald, of Great Britain, and President Hoover of the United States.

Seth B. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eighty times the magnetic intensity of ordinary sun spots, Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

## A Master Scientist

Dean Boyle, Of Alberta University, Accepts Post On Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its staff scientists of the calibre of Dr. R. W. Boyle, M.A., Ph.D., dean of the faculties of physics and applied sciences at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 45 years of age, is already one of Canada's foremost scientists, ranking not far behind Professor J. C. McLennan, of the University of Toronto. During the war he showed that he was no mere theorist in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has also been responsible for devices for the detection of icebergs. He appears one of Canada's master scientists and it is fortunate that his services are now to be made available for Canada as a whole. The University of Alberta has now given two of its staff to the National Research Council. Dr. H. M. Tory, chairman of the council, is a former president of that institution.

## Honey Extraction Plant

The latest machinery is being installed in the new extension to the plant of the Riedel Honey Company, at Taber, Alberta, and prospects appear to be first class. The new addition will be for honey extraction and a daily output of about 9,000 pounds is expected during the active season.

## Sheep Shearing In Alberta

Sheep shearing in the Picture Butte District, Alberta, is now about finished. Last year there were only five flocks in the district; this year there are 23, mostly ranging in size from 35 to 150 ewes.

She: "I read those verses you sent me to dad."  
He: "What did he say?"  
She: "That he was glad I was not going to marry a poet." — Buen Humor, Madrid.

W. N. U. 1797

## Want Night Air Service

Demand From Hamburg, Germany, To be Included in Present Plans  
Hamburg, Germany, is demanding that it be included in the present plans for night flying services that are to cover all Europe. The promoters of the service say that the favorable position of the city with its day services does not necessitate its having a place in nocturnal flights. While Hamburg authorities admit this they contend that the great importance of their city as a commercial center demands that it should be included. They point out that Hamburg is the junction for air service from Scandinavian countries, and it should at least have night-service connection with Berlin and Rhine via Bremen to enable passengers arriving late in the day to continue their journey.

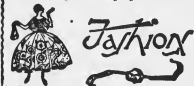

## Church Collections Suffer

Using Big Nickels Instead Of Quarters in Offerings At Ottawa

Governments have been blamed for troubles a plenty, but Canada's law-makers are cited as the cause of a new ill. Decrease in church collections is the latest trouble laid at the door of the Dominion Government, and a Chicago churchman has made the charge.

With the advent of the "big nickel," church collections have fallen off, a preacher stated today at a regular Sunday service. "The large five-cent piece," he said, "are dropped into the collection plate with a flourish that belongs to nothing less than a quarter. I don't blame the smaller collections on the people, I blame the Government."

## Winnipeg Newspaper Union

DRAPE FLARE

A new silhouette for the youthful smart woman. Shows the raised waistline, a chic detail all Paris flocks. The circular skirt in diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 556 combines printed and plain cotton voile, the popular summer fabric. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The deep slender hipline, makes it suitable for the larger woman, by placing the circularity of the waistline, green chiffon, tomato red crepe de chine, yellow handkerchief linen, orchid and white printed lawn, purple aster georgette crepe, printed rajah in capucine tones, and sky-blue sheer lace are distinctly smart combinations. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap over carefully.

## How To Order Patterns

Commemorate Harvester Inventor  
A memorial stone is to be placed on the site of the building where the first successful twine binding grain harvester was produced at Beloit, Wisconsin.

## HIGHLY PRIZED TROPHY

This is the Beatty Trophy, presented by the chairman and president of the Canadian Pacific Railway, for inter-regimental competition among pipers of Canadian Highland Regiments, to be played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 2. The gathering brings together pipers from one end of Canada to the other, from Nova Scotia to British Columbia, and is the great event of the year in Scottish-Canadian circles.

## Riches Of Northland

Vast Treasure House of Precious Minerals in Northern Canada

Last week Mr. W. C. Cain, Deputy Minister of Lands and Forests of Ontario, who has been studying northern Ontario all his life and is an enthusiast for that country, stated that in his recent trip to the far north he was struck by the picture of northern possibilities that was beyond his previous ideas on the subject. Some time ago "The Financial Post" told of the existence of a vast bed of amber under a lake in Northern Manitoba. Already as a result of the publication of this article, which incidentally drew comments in British and American as well as Canadian papers—private parties have set on foot plans for the complete exploration of this deposit. Last week another article in this paper told of various indications of precious stones in the north and even suggested the possibility of diamonds being found.

Gold and silver are now commonplace in our northern picture and platinum is becoming almost familiar to our mining men. Iron ore in vast quantities exists in Ungava and on the islands of Hudson Bay and aluminum can be extracted from northern clays. Copper deposits are known to exist in Northern Saskatchewan and run into the Arctic Circle and air voyagers have skinned down upon the surface of lakes in the far north to find nickel and other base metals.

The north is an amazing country in future wealth. Canada can no longer be regarded as a narrow belt 3,000 miles long. It is a vast country approximately 3,000 miles square, with as much promise in the far north as in the south and the west. — Moose Jaw Times.

## A New Safety Device

Polish Filers Make Test Of Life-Saving Overall

"Life saving overall," designed for trans-Atlantic filers, were given successful tests in Lake Maggiore, Italy, by two Polish filers who hope to fly from Milan to Chicago in mid-August.

The overalls are of an especially heavy rubberized fabric, equipped with valves by which they may be inflated. They will keep their wearers afloat for many days, their inventor asserts.

An added novel feature of the outfit is the equipment of electric batteries and light bulbs which will remain illuminated at least 60 hours De Faveri says.

## Tinted Glass Aids Plants

Seeds grow better under greenish-yellow glass than when under plain glass. So do the plants which are grown in Germany that have been experimenting with the tinted glass. Seeds planted under the colored panes were five times as productive as those under the plain glass, and also remained green longer.

In Mammoth Cave, Kentucky, there are fish and crayfish that have no eyes.

The cow is worshipped as a sacred animal in India.

## Ask Daylight Saving Act For Dominion

Move Being Made By City Council Of Stratford, Ontario

In reply to a resolution from the city council of Stratford, Ont., in which the local council was requested to petition the Dominion Government to pass legislation by which summer time will be made effective throughout Canada, special council instructed the city clerk, George Beach, to obtain information as to whether Stratford council is asking for daylight saving time for the summer months only or all the year round.

In the communication received, it was pointed out by the Stratford council that the Dominion Government had already been approached and petitioned by the former body. The Regina aldermen are in favor of Dominion-wide daylight saving time being established for the summer months, but are opposed to it being effective all the year round.

## Recipes For This Week

(By Betty Barclay)

## PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water. When tender, remove the skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, one teaspoon sugar. Add the seasonings and one tablespoon of butter to the parsnips. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons of flour and one cup of milk. Boil the mixture in a moderate oven. Serve immediately, or the souffle will fall.

## PINEAPPLE FUNCH

1 quart water.  
2 cups sugar.  
2 cups chopped pineapple.  
1 cup orange juice.  
1/2 cup lemon juice.  
Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool, strain and dilute with cold water if necessary. Either fresh or canned pineapple may be used.

## Saskatchewan Farm Loans

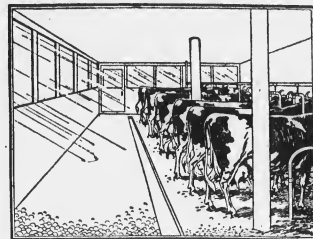

Since the Farm Loans board was inaugurated in 1917, more than 4,500 farmers throughout the province of Saskatchewan had received assistance by way of loans from the board. On December 31, 1928, according to the department of the treasury of that province. From the inception of the scheme to that date a total of \$13,000,000 had been loaned to farmers.

Since 1918 1,250,000 houses have been built in England, providing homes for five or six million people.

## WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, hoppers and all buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary weight weighs about 135 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, F.O.B., Toronto.

TORONTO, ONT.

## SUNDAY SCHOOL LESSON Canada And The British Market

AUGUST 11

## DANIEL AMONG THE LIONS

Golden Text: "The angel of Jehovah encampeth round about them that fear Him, and delivereth them." Psalm 34:7.

Lesson: Daniel 6:1-28. Devotional Reading: Psalm 91:1-16.

Explanations and Comments

Daniel's Promotion, verses 1-3.—It pleased Darius to make Daniel one of the three presidents over his satraps, and because "an excellent spirit was in Daniel," the king thought to set him over the whole realm.

The Ingenious Plot Of Daniel's Enemies, verses 4-15.—The jealousy of the other two presidents and all the satraps led them to try to compass Daniel's death. His record was unassailable; they saw that on the ground of his religion could be attacked. They then concocted a scheme to play upon the king's vanity as to induce him to pass a law that for thirty days no one should ask a petition of any god or man save the king only—though he were a god to whom the whole nation must pay divine honors. Who should violate this decree should be cast to the lions. There was no allusion to Daniel; the king was immensely flattered and all unsuspecting of the purpose behind the request, fell into their trap. Evidently he took no time for reflection, but immediately signed the law, and the law of the Medes and Persians altered not. The unavailability of a decree of a Persian king is frequently referred to in the Book of Esther.

Thus illustrates the danger of adopting suggestions without considering their consequences. The probable consequences of acts which we contemplate should always be carefully considered, especially in their bearing upon others.—J. E. McFadyen.

Daniel continued his habit of prayer, and he did before the decree was issued; and not only did he pray but he gave thanks in the face of the fate he knew was approaching.

"Early in the morning, before you come down into the streets of Babylon to hear its talk and breathe its impoverished atmosphere, open your windows. Look out upon the sources of strength. Wait upon it until your soul mounts up with wings like an eagle. Wait upon it until your moral nature can run upon strands of gold, fullness and not grow weary. Let your heart gain a fresh sense of the most intense interest in Christ Jesus, and you will not be afraid of Babylon and all its lions."—Charles R. Brown.

As Daniel was consigned to the den of lions, the king said to him, "Thy God whom thou servest, He will deliver thee."

After seeing the month of the den with his seal, the king passed the night sleepless and fasting, and the morning hastened to the den. With "lamentable voice," a voice quivering with grief, he cried to Daniel, "My God hath sent His angel, and hath shut the lions' mouths," answered Daniel, who was there unharmed.

Prince Is Expert Typist

The Prince of Wales has been revealed as an expert typist. On a recent trip to the north of England, he carried a typewriter with him, balancing it on his knees in the train and setting down his impressions of the journey.

Quantity Shipments of Farm Produce Just as Necessary as Quality Standard in Order to Hold Trade

In a very instructive article that he has written for the Country Guide of Winnipeg, W. A. Wilson, Canadian Agricultural Products representative on the Empire Marketing Board, brings out some of the reasons why Canada is not getting a larger share of the British foodstuffs market. One point that he brings out is of very great interest; it is that quality itself is not sufficient to win the British market; there must be quantity as well.

What Mr. Wilson means is that sales contacts cannot be established and maintained in Great Britain unless there is assurance of an adequate and steady supply of the commodity sold, be it bacon, eggs, meat, salmon, or other foods. This is the lesson that Canada has not learned, Mr. Wilson indicates. We have no raised the quality of our food products that they are thoroughly satisfactory to the British consumer, but we do not provide for Britain a steady supply of our goods. British buyers are very chary of shifting their sources of supply unless they are given every assurance that they can always get what they want when they want it.

Mr. Wilson believes that Canada, in improving the quality of some food products, has shown ability in both leadership and workers. He considers it quite as reasonable to assume that Canada can work out the problems of quantity production that is necessary to hold the British market.

To judge from the article one would assume that all that is necessary to overcome Canada's handicap is to lessen the inertia of the Canadian farmer and farm organizations. If the problem does not go deeper than that, it will not be difficult to solve. The Department of Agriculture at Ottawa and in each of the provinces and the various farm organizations have a tremendous opportunity to aid in expanding Canada's export trade.

## Made-In-Canada Exhibition

Will Show Public Quality Of Goods Produced In Dominion

Co-operation of various bodies with the National Produced-in-Canada Exhibition, which will be held in Montreal from November 4 to 9, already seems assured, according to reports received by the Canadian Manufacturers' Association, Quebec division, Montreal branch. "These reports," says the Gazette, "show the consensus of opinion strongly supporting the scheme to illustrate to the public, through the medium of the exhibition, the quality and diversity of goods which are produced in Canada by Canadian manufacturers for Canadians."

In the days of our Grandmothers and Great Grandmothers this name **McClary** meant a great deal just as it does today. Buy goods bearing the **McClary** name with complete confidence.

## The Singing Fool

By HUBERT DAIL  
Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballad singer, but she scornfully tells him he will never marry a waiter. After she refuses to read a love ballad he has written for her, she goes to the Marcus table and tries to ingratiate herself with the great producer. Al is in despair, but at Blackie Joe's suggestion he goes on the floor and sings the love song himself — to Molly. He is given a marvelous ovation. Grace, the cigarette girl, who is deeply in love with Al, is in tears. Even Molly is touched. Marcus asked enthusiastically, who wrote that song? and Molly answers, "The waiter—but I gave him the idea."

### CHAPTER VII.

Marcus gazed at Molly with renewed interest.

"You gave him the idea, you did? Well, that number has a corking idea. I have a hunch where I can get it right now. Can you get the waiter over here? I want to talk to him."

Molly was up in a flash.

"Of course he'll come over. I'll get him for you right now."

She tripped away rapidly, heading for Al, who was still standing in the main room by the dressing-room door. The crowd was clamoring for an encore and Molly walked among the clapping customers, hardly able to credit the turn in events. One thing was certain, Al, the obscure waiter, was already on the high road to an immense success. If Marcus took one song he would take others that Al had written. And this was the man whose love she had scorned but a half hour before? That was the song she had refused to read and pushed carelessly from her dressing table!

How would Al greet her now? She wondered as she walked toward him. Would he show pride because she had dismissed him; would his pride make him treat her coldly? Meanwhile, Blackie Joe was using his best efforts to induce Al to sing an encore.

"Go out once more, Al," he pleaded. "Give them something else—anything will do. Can't you hear how they've stopped the show for you?"

But Al shook his head. "No, Blackie, I can't do it. I put everything I had into that song. I just can't repeat."

Blackie saw it was hopeless to argue. Al's face was white as a sheet; it was evident that the boy had drained his emotional energy to the utmost in putting the song over. Blackie turned quickly to a troupe of dancing girls and ordered them on the floor.

At the Marcus table Al was quickly introduced. Then the producer came directly to the point.

"You have some great catch lines in that number," he said. "And a good melody. I want it for my revue and I'll get it published for you."

Al sat down, facing Marcus. He was awed and fascinated by the man's appearance and authoritative manner. He knew Marcus by reputation—everybody in New York did—and he understood that Marcus's okay meant bright light fame for him, a mere singing waiter. Yet so blinded was Al by his adoration for Molly that it never occurred to him to think she was staying up to him because of Marcus's suddenly bestowed approval.

As Al faced the producer he felt Molly's hand, slipped surreptitiously and confidently into his own. He smiled happily and answered Marcus:

"But you know, that's not my song."

"Not your song?" repeated Marcus, obviously puzzled. Then he glanced toward Molly. "You said he wrote it."

"Yes, I wrote it," added Al quickly, "but it's really Molly's song. I wrote it for her—I couldn't have written it without her."

Marcus waved the remark aside; he wasn't interested in the sentimental reason for the song's creation.

"I don't care about that—you turned out the words and music. I want the number. I want all you can write like it. If you can hold up to that level and repeat consistently I can make your fortune for you!"

Marcus spoke convincingly—Al realized that he meant every word he said. But in all this talk he did not mention Molly. If the producer believed he could push Molly aside, he was sadly mistaken.

Al was determined that she should share in any success that came to him. He decided to speak plainly.

"I want Molly to sing everything I write," he asserted. "I want you to have the song, but if you take it you'll have to take Molly too."

Al thought the producer's face fell a trifle at that ultimatum.

"Don't you see," argued Al, almost vehemently, "that no one can put over my heart songs the way Molly does. You've never heard her sing—she's a wonder! And this number was written for her!"

Marcus shook his head. "But I've got a headline of my own—a marvelous little girl. Your song will fit her perfectly."

"Headliner?" countered Al. "Yes, I know, but Molly would be a headliner too, if you just give her a chance. Mark my words!"

Al scarcely recognized himself, talking up to this celebrity just as if Marcus didn't mean a thing to him.

He felt Molly's grip on his hand tighten. Then, suddenly, the revue expert threw up his hands in acquiescence.

"All right, come to my office tomorrow. Both of you."  
(To Be Continued.)

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It is the heaviest of all human ills to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

### Commemorates Historic Flight Across Channel

Louis Bleriot Repeats Feat Of Twenty Years Ago

Louis Bleriot, French aeronautical pioneer, flew the English Channel July 27. Twenty years ago that same news spread around the world and recorded the first flight ever made between France and England.

Bleriot landed close to the monument which commemorates his historic crossing and then hurried on to London where he was feted on the twentieth anniversary of his first air trip across the channel.

### Case Is Settled

Bursting open the door marked "Private," the butcher confronted the local lawyer.

"If a dog steals a piece of meat from my shop, is the owner liable?"

"Certainly," replied the lawyer.

"Very well, your dog took a piece of steak worth a half a dollar about five minutes ago."

"Indeed," he returned smotherly. "Then if you give me the other half, that will cover my fee."

A lever on the steering wheel of a new English automobile changes the gears into six positions.

Six machines that say "Thank You" after delivering an article, are now installed in Germany.

Dry mouth and parched throat are grateful for the refreshing coolness of Wrigley's Spearmint.

Wrigley's whitens teeth, sweetens the mouth, clears the throat and aids digestion, while the act of chewing calms and soothes the nerves.

after every meal

### Probing Trade Secret

Experts Trying To Discover Source Of Power Possessed By Electric Eels

Six electric eels have been brought from Trinidad to the zoological gardens at Philadelphia, and a dispatch from that city declares that electrical experts will try to discover the sources of the visitors' electrical energy. These natural electrical plants average six feet in length and five-sixths of their plant space or content, are devoted, it is explained, to current-generating apparatus. It is averred that one of these eels, properly "hooked up," can light up a small electric bulb, run a toy train or operate an egg-beater. In their natural habitat, the eels retire to rocks and "rest up" while their batteries are being recharged. How they do it, is one of the trade secrets that electrical scientists will try to persuade the visiting eels to reveal.

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe remedy, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They can be used by babies of any age, and by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Little Helps For This Week

"But without faith it is impossible to please Him; for he that cometh to God must believe that He is, and that He is a rewarder of them that diligently seek Him."—Hebrews xi. 6.

But turn, my soul, Learn thou the beauty of Omnipotent care; Be strong in faith, bid anxious thoughts still, Seek for the good and cherish it; the Seek Oppose, or bear with a submissive will.

—William Wordsworth.

To me, I confess, it seems a very considerable thing just to believe in God; difficult indeed to avoid honesty, but not easy to accomplish I thought, and impossible to compass to perfection; a thing not lightly to be professed, but rather humbly sought; not to be found at the end of any syllogism, but in the honest fountain of purity and affection; not the sudden gift of intellect, but to be earned by a loving and brave life. It is, indeed, the greatest thing allowed to mankind, the germ of every lesser greatness.

—Anne Gilchrist.

Shows Human Intelligence

Elephant Remembered Spot Where Mate Was Killed 44 Years Ago

Alice, 110-year-old elephant, who was with Jumbo when he was killed at St. Thomas, Ont., in 1885, was back there recently. When she arrived at the spot where Jumbo was killed Alice went to her knees, stamped and writhed and trumpeted shrilly, causing eight other elephants to go on a rampage. They were quieted when Alice had to cross the same spot again she repeated her demonstrations of sorrow. A dog which Alice's constant companion was used to bring her away.

Keep Minkard's Liniment always handy.

Large Trade With Orient

A large increase in the production of dry-salted herring and the development of a big trade with the Orient in this respect has been one of the striking items of progress in connection with British Columbia's fisheries in the past few years. Last year the pack of dry-salted herring in the province amounted to 107,215,800 pounds, practically all of which was sold to the Orient.

"Well, lovely daughter of the mountains, are you watering the cattle?"

"Yes, Are you thirsty?"

If you can pick and choose don't choose to pick flaws.

People who weigh their words seldom speak lightly.

### Sky Scraper Apartment For Chicago Suburbs

Buildings De Luxe Designed Only For Wealthy Occupants

A really development group in Chicago is planning to take the skyscraper out into the country. It proposes the erection of a fifty-apartment "cloud-piercer" on a fifty-acre suburban tract "surrounded by country clubs and forest preservers." The apartment dwellers will have on their own collectively owned premises a golf course, tennis courts, a bridge path, a swimming pool and recreation fields for adults and juveniles. Their building will contain a clubhouse with dining, billiard and card rooms. Another community building a little distance away will house a drug store, delicatessen, beauty and barber shops, medical and dental offices. Thus the luxuries and conveniences of city life, plus the attractions and facilities of the spacious countryside, are promised the prospective buyers of these rural sky-scraping apartments—which are being designed, it should go without saying, for "wealthy" occupants.—Brandon Sun.

### CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe remedy, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They can be used by babies of any age, and by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### NOTES AND COMMENTS

Whatever may be the feelings of farmers in this pro-  
longed dry spell throughout Western Canada and the  
States, it has been ideal weather for those who are fortu-  
nate in being able to take a holiday in the mountains. And  
the finest enjoyment of all is in getting off the beaten trail  
with its dust and heat, and scurrying automobiles, and tak-  
ing it leisurely beneath the shade of the tall timbers.

Dwellers in the towns of the Crows Nest Pass enjoy  
privileges which are envied by the prairie and city and town  
dwellers. It helps to provide recreation during a quiet  
season in the mines, which in itself is some compensation  
for the loss of revenue occasioned by lack of business.

This is the age of wheels. The enjoyment which a car  
affords cannot be resisted by the great majority. And  
when money is being earned steadily a car can be paid for  
by careful management. It is when business slackens up,  
or crops do not come up to expectations that difficulties  
arise. The instalment plan undoubtedly enables people to  
enjoy many things which otherwise they would do without.  
It is up to the individual's judgment as to what he can  
afford.

The new corner filling station gives more satisfaction  
and pleasure for the money than did the old corner  
saloon.—Exchange.

Hon. R. B. Bennett's appearance in Fernie on August  
28 will doubtless be greeted by a large number of people  
from the Crows Nest Pass. It is seldom that leaders of  
either political parties make campaign tours of the Domini-  
on, and they are worth hearing, no matter which party one  
may be a supporter of. Their addresses carry a great deal  
of enlightenment on national affairs, which every citizen  
should take the opportunity of hearing. Added interest is  
given to his tour in the west from the fact that he is a Cal-  
gary man of whom that city is proud.

The town council has ordered a few barrels of oil to  
abate the dust nuisance on Main street. It cannot be laid  
too soon, for with the steady stream of local and tourist  
traffic the business area is clouded with a pall of dust the  
greater part of the day.

"The shades of night were falling fast,  
As through an Alpine village passed,  
A lad who bore 'mid snow and ice  
A banner, with the strange device,  
'Excelsior!'"

This was not Steve Janostak, but his banner bravely  
floating at the top of the Crow, and which was the centre of  
attraction through the field glasses on Monday, reminded  
one very forcibly of the boy who would not be daunted as  
told in that celebrated poem, "Excelsior!"

The Graf Zeppelin, Germany's giant air liner, though  
making a successful trip, does not beat the fastest ocean  
liner by a very wide margin. Only eighteen passengers  
were carried, which makes it apparent that this form of  
travel is yet considered too risky by trans-Atlantic passen-  
gers. With the competition between the steamship compa-  
nies to make fast trips it does not appear that the airship  
will be a serious competitor for a long time to come. Ger-  
many at present holds the record for air and steamship  
crossings of the Atlantic, and it will be of world-wide in-  
terest to see what developments will take place when the  
English airship and the fast liners now under construction  
make their attempts to lower the records held by the  
Germans.

About two years ago a war memorial committee dis-  
cussed the placing of a memorial to the war dead of Cole-  
man. The project has dropped out of sight, though there  
is a trust fund of over \$500 in the bank. Some have sug-  
gested that instead of a monument that this be the start of  
a building fund to erect a suitable club for men. With the  
closing of The Legion club, there is no place other than the  
open-air club where men might gather. A well conducted  
club would be appreciated by a large number of men, parti-  
cularly those who board at various places. There is need  
of a social centre, and the project suggested is well worthy  
of serious consideration.

There is much truth in the saying that a man is as old  
as he feels. Despite advancing years, one can keep young  
in outlook, and be one of the boys at 70 as well as he can at  
25. He may not be able to do as many stunts or be as ac-  
tive physically, but he can at least cultivate that optimistic  
outlook on life that as he becomes older he realizes more  
than ever that all life is progressive, right up till the time  
when the curtain drops on this earthly existence. Nothing

stands still. You must keep moving to enjoy life—your  
mind cannot function at its best if you are living in the  
past. The apparent extremes of modern youth are no  
more extreme than those of the youth of fifty years ago.  
Progress is the keynote of zest and accomplishment.

Suggestion is made by an American player that the  
word "Love" be eliminated from the game of tennis. Evi-  
dently he is sick of the word. He states it makes the game  
appear too effeminate.

## RE-CONDITIONED CARS

1928 Essex Sedan	\$825.00
1926 Chev. Ton Truck with body and cab	\$450.00
1926 Chev. Roadster Delivery	\$295.00
1926 Ford Coupe	\$250.00
1924 McLaughlin Touring with glass enclosure	\$295.00
1927 Chrysler Coach	\$550.00

All these cars are in good mechanical con-  
dition and can be purchased on the liberal  
time payment plan.

## When buying was one long experiment

---

**"I'll try a pound of this," said your grandmother, "--if you are sure it's fresh."**

That was some time in the second hour of her morning's search for groceries. She went from one open barrel or box to the next, along an unappetizing row of crackers, teas, cereals, dried fruits, lard and sugar --all in bulk. She shooed the flies away, looked at, touched and tasted each article suspiciously, and finally decided to buy or not to buy, as her judgment directed. She couldn't trust a servant to do it. It was a day's work in itself.

Today, in two minutes, you give the grocer your order. You know that everything you get will be fresh, pure, attractively and cleanly packed. Why? Because you ask for advertised brands.

Advertising has taken hours of hard labor out of every housewife's day, and lines of worry off her forehead. It has made the morning's marketing a matter of certainty instead of guesswork.

## Reform Of Electoral Methods

Recent elections in Great Britain, in Canada, and more recently still in the Province of Saskatchewan, all seem to point in the same direction, and that is to a change in the system or methods of choosing Parliamentary representatives. For many generations the underlying principle of the British system of responsible government has been ruled by the majority of the people as indicated by their selection of party representatives in the House of Commons or Legislative Assembly, as the case may be. And such representatives were chosen, for the most part, by constituencies represented by a single member. So long as the electorate was divided into only major parties or groups of political thought this system worked fairly well, although it was never wholly representative of public opinion.

Now, however, that the two-party system has been, or is being, replaced by three and sometimes four or more parties, the weaknesses of the system have become apparent, and the old principle of rule by majority is rapidly becoming impossible of realization. On the contrary, at Westminster, at Ottawa, at Regina, each party represented in Parliament is a minority party, and in each instance the smallest of these minority groups holds the balance of power. In each of the legislative bodies referred to, the group having the largest representation in the House constitutes the government party, but at any moment, and on any question that may arise, the government may suffer defeat and be called upon to give place to another minority group.

With the exception of the United States where the two-party system continues in favor, partly, perhaps, because it is so interwoven into the whole fabric of government, national, state, municipal, even county and judicial, it appears to be giving way throughout the world. In Germany, France, Belgium, and other countries having responsible government, the government is only possible by a coalition of parties, or a working understanding between them. Admittedly, it does not make for strong government or stability in government, France being a notable example.

The multiplication of political parties or groups has, in most European countries, brought about a change in electoral methods. In some, single member constituencies have been abolished, the single transferable ballot, or Proportional Representation adopted, or the second election system inaugurated. Even in the United States the primary system almost amounts to a second election. In a word, it is recognized that the single member constituency where a mere plurality of votes is sufficient to elect, regardless of the number of candidates in the field, no longer meets the needs of the situation.

And it is becoming increasingly evident that it will not for long prove acceptable to the people of Great Britain, or Canada, or in the Provinces of Alberta. Opponents of Proportional Representation have always argued that it tends to a multiplication of parties or groups, but the fact now has to be faced that this multiplication has taken place under the existing system. The system itself, therefore, must be altered to meet the changed conditions.

Most politicians will not welcome any change, but they cannot prevent it. The important question is—What basis of representation and method of voting shall be adopted to best meet the needs of the new conditions that have arisen? Already the subject is engaging the attention of political students in Great Britain, and it is confidently predicted that the unwritten constitution of the Old Country will undergo some change. Occupying the commanding position he does in the present Parliament, and suffering the handicap of a much smaller representation in the House of Commons than the vote polled by his candidates in the country justly entitles him to, Lloyd George will not long remain content with things as they are. He can, and probably will, demand as one price of his continued support of the Ramsay MacDonald Labor Government a reform of electoral methods and machinery which will accord full value to every individual vote cast, and not place third or fourth party candidates at a distinct disadvantage.

Whether the solution is to be found in larger multiple-member constituencies replacing the present single-member seats, with the adoption of the single transferable ballot, or even Proportional Representation, or in a complete change in the accepted form of cabinet responsibility, involving a fixed term for Parliaments and Legislatures, down to a government of the right of dissolution except upon a straight vote of want of confidence, and the formation of a cabinet consisting of representatives of all groups, and based upon their respective numerical strength in the House, time alone will disclose.

One thing, however, may be accepted as sound, and that is that the genius of British statesmanship which in the past evolved the best form of democratic government the world has yet known will be capable of meeting the new situation and solving the problems which it presents.

## Plane In Freak Accident

Strikes Steam Roller In Making Landing At Roosevelt Field

When an aeroplane and a steam roller collided at Roosevelt Field, N.Y., the accident ruined the plane and injured the operator of the roller.

James Riddle, piloting a small

monoplane in which two friends were riding as passengers, chose for his landing a part of the field which is being levelled off and on which two steam rollers were at work, hidden from the air by the cloud of dust they raised.

The descending plane took off the smoke stack of one of the rollers and bowled the operator, A. C. Madberal, from his seat, breaking his shoulder. The plane crashed, tearing off the left wing, and otherwise damaging it beyond repair, but Riddle and his passengers escaped without injury.

## Plant Grows Leaves After Having "Sleep"

Replaces Withered Foliage In Fifteen Or Twenty Minutes

After "sleep" of from 15 to 20 minutes, a plant, recently developed in Germany, produces new leaves. So sensitive is it that if the leaves are touched, or a match burned near them, they immediately wither and fall off. In about a quarter of an hour after the withered leaves have dropped off, new ones grow out. The plant is a member of the mimosa family. It grows in great quantities in India, where it is gathered and sold for commercial purposes. The bruised leaves are said to have a high medicinal value in healing burns.

## U.S. To Reduce Military Expenses

President Hoover Says Military Budget Now Greater Than Any Other Country

President Hoover intends to establish a commission of army officers within the general staff to see what can be done toward reducing military expenditures.

The commission, the president said recently, would be charged with making an enquiry to determine what has been made obsolete by scientific advancements and could be done away with, and what army programmes can be spread over longer period than originally intended and at the same time maintain complete and adequate preparedness.

The president said the purely military expenses of the United States constitute a military budget greater than that of any other nation and at a time when he considers there is less danger of war than at any period within the last fifty years.

It is now estimated, he said, that the military outlay for 1923 will be \$803,000,000, which is \$120,000,000 more than the similar expenditure for the fiscal year just closed, and compares with an average pre-war expenditure for military activities of the army and navy of \$368,000,000 annually.

## NEW HEALTH FOR TIRED-OUT WOMEN

Found In The Rich, Red Blood Dr. Williams' Pink Pills Actually Make

Anaemia comes on gradually, beginning with languor, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the palpitating of the heart, headaches, frequent headaches and often disturbed digestion and an inability to obtain rest at night. Cases of this kind, which become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are from an harmless or habit-forming drug, are just the tonic needed to remedy this wretched state of health. These pills actually make the rich, red blood that stimulates and strengthens every organ and nerve in the body. This strength and activity return, the appetite improves and restful sleep is had. What Dr. Williams' Pink Pills can and will do is shown by the case of Mrs. D. B. Fanning, Seal Harbor, N.S., who says: "I was in a badly run-down condition. I was pale, my appetite was very poor, and the least exertion would leave me tired and weak. In fact I was hardly able to do much work about the house. I decided to try Dr. Williams' Pink Pills. After taking a few boxes can truthfully say I had gained greatly in health and strength and was able to go about my work with no sign of the former weakness. I cheerfully recommend them to anyone who may be in a run-down condition." You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Cyclists Honor War Dead

Nearly 10,000 cyclists, many of whom had ridden all night from the extremes of England and Wales, gathered on a recent Sunday morning before the National Cyclists' Memorial, at Meridan, believed to be the exact centre of England. About 3,000 of the cyclists were girls, and most of them were cycling breeches. A brief service was held at the memorial, which was erected seven years ago to commemorate cyclists killed in the World War.

For Scalds Or Burns.—Dr. Thomas Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Canada's Iron-Making Centres The three iron-making centres in Canada are: Sydney, Nova Scotia, on the Atlantic Coast, and Hamilton and Sault Ste. Marie in the province of Ontario.

Minard's Lincture For Neuralgia.

Dr. Malcolm Sarent, the famous English orchestra conductor, has just refused \$25,000 as musical director of a London motion picture theatre which would require only three ten-minute appearances a day.

## Alberta Premier Tours North

Party Will Go To Extreme Northern Part Of Province

Hon. J. E. Brownlee, premier of Alberta, and Dr. R. C. Wallace, president of the University of Alberta, have left Edmonton over the Northern Alberta Railway for the Peace River country on a four weeks' tour of the north in which they will use railway, power boat, auto and aeroplane.

Their itinerary will take them as far as Fort Fitzgerald on the northern edge of the province, then into the Northwest Territories to Great Slave Lake and as far east as Lake Athabasca on the northeastern corner of Alberta.

They were accompanied by John M. Imrie, managing director of the Edmonton Journal, who joined the party on Premier Brownlee's invitation. This will be the first time in the history of the province of Alberta that the head of Alberta's government and the head of Alberta's University will travel to the extreme northern boundary of the province. The itinerary also includes a four days' speaking tour of the Peace River country by the premier, a visit to the Wood Buffalo Park and inspection of mineral development in Great Slave Lake and around Lake Athabasca.

Inspector Hancock of the Alberta Provincial Police is in charge of all arrangements.

## Many Claims For Czar's Fortune

Three Corned Legal Fight For Millions Left By Assassinated Ruler

The personal fortune of the late Czar Nicholas II., of Russia, reported to be approximately \$100,000,000, has become the object of a three-cornered legal fight which is expected to be tied up in the courts for years.

The Soviet Government is the last party to lay claim to the fortune, much of which is supposed to be on deposit in the United States. Another claim has been entered by a woman, now in the United States, who says she is Princess Anastasia, youngest daughter of the Czar and the only member of the family to escape assassination in the revolution. She is known as Mme. Tschakowsky. Recognized relatives of the late Czar, who claim Mme. Tschakowsky is an impostor, also are fighting for a share of the money.

## Keeps a Mouse Farm

Have you ever heard of a mouse farm? There is one at Rayleigh, in Essex, where mice are reared just as cattle and sheep are on ordinary farms. There are 50,000 mice, and of nearly every color. Yet, although there are so many, Mr. Tuck, the farmer, can put his hands on any one of them at a moment's notice. About three hundred young ones are born every day, and it takes five hours to feed them all. They are sold to colleges and hospitals for experiments.

## Garage For Women Autolists

A garage for the sole use of women autolists has just been adopted by women in London. A club devoted to feminine needs is a feature. Here fair motorists have writing rooms and dressing and change rooms, with bathrooms adjoining. Women auto enthusiasts recently dedicated the place with solemn ceremony.

Minard's Lincture For Summer Colds.

## Reduced Crop Likely To Halt Immigration

Some Of Departmental Money May Be Used To Assist Farmers

The crop situation in Western Canada will have a salutary effect on immigration, it is believed in the capital. The foresightedness of Hon. Robert Forke in limiting continental immigration and shutting it off on May 31, is considered as having prevented a more serious situation in the west and relieved to some extent the inevitable burden of unemployment which follows a poor crop year. Mr. Forke has been in Western Canada with W. J. Egan, his deputy, and it would not cause surprise at Ottawa to find that still further restrictions will be placed on continental immigration, and that even British immigration may be pared down.

At present any Britisher can come to Canada at the low rate of \$50. The nominal rate is \$90, the balance being made up by the British and Canadian governments. With poor crops in the west and less employment, the Government will guard against an undue influx which may swell the unemployed. Farmers can't carry hired hands through the winter when the crop has been poor and the cities will have enough unemployed with those already here.

There is even a suggestion that some of the immigration expenditure may be diverted to assist the farmers, should conditions develop along the down road as at present. The land settlement board, formerly the soldier settlement board, may be called upon to keep track of the farmers in the various stricken districts and render such aid as may be possible.

## Prince Receives Prize Winner

Successful Marksman at Biele Also Had Messages of Congratulation

The Prince of Wales received Lieut.-Col. R. M. Blair, commanding officer of the Seaford Highlanders, Vancouver, B.C., at St. James Palace and congratulated him on his success in winning the King's Prize at the recent meet of the National Rifle Association at Biele. In addition to a host of messages from Canada, Lieut.-Col. Blair is especially gratified by the receipt of congratulations from every battalion of the Seaford Highlanders in the British army, he said. An old lady, a perfect stranger to Lieut.-Col. Blair, has written to the King's Prize man from Guernsey, one of the Channel islands, expressing the hope that he is a teetotaler.

It Bids Pain Begone.—When neuralgia racks the nerves, or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

A notion prevails that no automobile driving is reckless unless an accident happens.

Tusks of 4,000 elephants go into the world's annual supply of billiard balls.

A DOZEN different things may cause a headache, but there's just one thing you need ever do to get immediate relief. Aspirin is an absolute antidote for such pain. Keep it at the office. Have it ready in the home. Those subject to frequent or sudden headaches should carry Aspirin in the handy pocket tin. Until you have used it for headaches, colds, neuralgia, etc., you've not known Aspirin's value. It means quick, complete relief to millions of men and women who use it every year. And it does not depress the heart.

Turner Valley Oil

Production and Revenue Shown To Be Increasing Rapidly

The Turner Valley oil field in Alberta becomes increasingly significant and its production and revenue are steadily increasing. A continuous rise in naphtha production has been recorded month by month since the beginning of the year. In January there was a total of 38,501 barrels turned out with a value of \$154,000, which rose by constant increments to 92,122 barrels with \$368,480 in June. The total for the six months of the year was 356,272 barrels of crude naphtha worth \$1,545,088. The expectation is for fully 100,000 barrels in July which would give a revenue for the month of some \$400,000.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

## Tourist Traffic Heavy

Tourist traffic in the west will break all records this year, judging from present indications, in the view of H. F. Matthews, of Winnipeg, general manager of western hotels, Canadian Pacific Railway. The mountain resorts are booked almost solidly for the season, he said, especially the hotels at Banff and Lake Louise.

## SUGGESTS THAT BRITAIN SINK PART OF FLEET

Washington.—Great Britain was called upon in a statement issued by Chairman Borah, of the Senate Foreign Relations Committee, to sink some of her ships as a means of reaching a parity with the United States.

Borah said England has 59 modern cruisers while the United States has eighteen built or building.

"If Great Britain will follow our example at the Washington conference," he said, "and sink some of her ships and thus come to parity, it will not only save the taxpayer but reduce the incentive to war—for huge armaments are always an incentive to war, parity or no parity."

"But if we have to build up to parity, it vastly increases the burden of the taxpayer and augments the incentive to war."

The Idaho senator was a luncheon guest recently of President Hoover, and it is presumed the impending naval limitations conference between Great Britain and the United States was discussed.

London.—The sacrifices entailed by the British Government's latest disarmament move are stressed by the Daily Telegraph, the newspaper pointing out the two cruisers, "Surrey" and "Northumberland"; the submarine depot ship "Medway" and two submarines belonged to the 1928 program and money had been voted months ago.

Advices from Glasgow are that at least 700 men have been thrown out of employment by suspension of work on the submarine being built there. The keel of the submarine had already been laid and the frame of the hull was being advanced.

## Cotton Strike Still Far From Settlement

Powerful Weaving Branch Refuses To Consider Wage Reduction

Manchester, Eng.—Lancashire's cotton mill stoppage continues with prospects slimmer than ever for an immediate settlement and return to work of its striking operatives.

The employers professed still to be ready to negotiate for a solution of the dispute and the card room workers and spinners seem prepared to negotiate with them, but the powerful weaving branch was determined to remain adamant in opposition to the proposed wage reductions.

Meanwhile a section of the British press commented on the serious loss to British industry growing out of the stoppage as a consequence of the opportunity it gave rivals to seize the national trade.

Germany, France and Japan were reported in these quarters as optimistic over the opportunities presented. The Mail declared northern France would reap a golden harvest, orders which ordinarily would go to Lancashire going to Lille, Roubaix and Tourcoing. The paper said the French textile mills were working at top speed.

The Express printed an article by an unnamed authority attacking the obsolete organization of the cotton industry, which the writer said, is still bound by the methods of 60 years ago, absurd under present conditions.

**Predicts 300,000,000 Bushel Crop**

Toronto.—Col. Ralph H. Webb, former mayor of Winnipeg, said here that in his estimation the total Western Canada wheat crop would amount to about 300,000,000 bushels. From his sources of information he believed Manitoba would have the best crop for some years and while there will be many lean spots in Alberta and Saskatchewan, other portions of these provinces would show good yields.

**Sentenced For Manslaughter**

London, England.—Richard Joshua Reynolds, 23-year-old American, of the wealthy Reynolds tobacco manufacturing family, was sentenced in Old Bailey Court to five months imprisonment without hard labor on a manslaughter charge growing out of an accident last May in which a motor cyclist was killed.

**Progress Is Satisfactory**

London, Eng.—Recent satisfactory progress toward an Anglo-American agreement on naval limitation has raised the belief in well-informed circles here that participation of other naval powers in the conversations may not be far off as long as previously was anticipated.

## Development In Aviation

Vancouver and Halifax May Be Linked By Air Route By 1931

Winnipeg.—Unprecedented development of aviation in Canada and the possibility of the Dominion realizing a transcontinental air mail service, linking Vancouver and Halifax by 1931, were heralded here by Major Gen. J. H. MacBrien, of Ottawa, president of the Aviation League of Canada.

Completing 1,500 miles of a solo flight from Ottawa, the famed Canadian flying "ace" piloted his little Gypsy Moth to a perfect landing at Stevenson Aerodrome, Winnipeg. General MacBrien is en route to the Pacific coast.

"Progress in Canadian aviation has been satisfactory," said Gen. MacBrien, "and a rapid development is taking place. Commercial aviation is growing steadily in Canada. New mail routes are being opened all the time, new flying clubs are being formed, and generally the situation is very promising."

Referring to the establishment of a transcontinental airway, Gen. MacBrien stressed the importance of perfect organization and pointed out that links were already started in both the east and west.

Completion of the service will witness feeders being supplied from northern provincial districts such as Hudson Bay, Peace River, Northern Ontario and Quebec," he said, "and eventually the Dominion will boast one of the most extensive and enterprising services in the world."

## Increase Shown In Infantile Paralysis

Warning Sent Out From Ottawa To Guard Against Outbreak

Ottawa.—Telegrams sent forward from Dr. J. A. Amyot, deputy minister of health in the Dominion Government, to all the deputy ministers of health in the provinces advising them that returns showed an increase in infantile paralysis and warning them as to the best methods to be adopted should the situation become acute.

A "blue book" is also being rushed through the Government printing bureau and will be widely distributed explaining the disease and how to combat it in the light of recent developments. The book has been written by Dr. Helen MacMurchy, chief of the division of child welfare. It will be issued under instructions of Hon. Dr. King, Minister of Pension and National Health.

Some three years ago infantile paralysis was prevalent in California and other Pacific Coast states. British Columbia was not seriously affected. In 1927 it spread to Alberta where there were 354 cases. Last year it reached Manitoba where there were at least 435 cases. The increase noted is in Ontario. The department does not wish to frighten the public, but it does wish to advise them of a danger which may develop quickly because of the contagious nature of the disease.

## To Form Canadian Geographical Society

Will Aim To Make This Country Better Known To Canadians

Ottawa.—A national board of directors has been elected as a first step in establishing the Canadian Geographical Society aimed at making his country better known to Canadians and to those outside the Dominion. The society intends to issue a magazine.

The directors are: Dr. W. B. Brock, University of British Columbia; Dr. R. C. Wallace, president of University of Alberta; Dr. W. C. Murray, president University of Saskatchewan; J. W. Dufoe, managing editor Manitoba Free Press, and Dr. Charles Campbell, Deputy Minister of Mines.

**Admits Bank Robbery**

Smithers, B.C.—James Wesley Burke, captured recently after a two weeks' man hunt, has confessed to robbing the Royal Bank here of more than two thousand dollars on July 17. He was committed for trial on a charge of robbery with violence. Practically all the money taken has been recovered.

**To Attend Labor Session**

Ottawa.—Right Hon. J. H. Thomas, Lord Privy Seal, in charge of the unemployment situation under the Labor Government in Great Britain, has accepted the official invitation of the executive of the Trades and Labor Congress of Canada to be present at its convention which will be held at Saint John, N.B., during the week of August 26.

## Replies To Critics

President Hoover Feels Justified In Postponing Work On Cruisers

Washington.—The agreement between the United States and Great Britain looking to complete equality in the strength of their navies is held out by President Hoover as an answer to critics of his decision to postpone work on the three cruisers laid down in navy yards next fall.

Quoting our naval authorities as regarding parity with Great Britain as "a complete defence of the United States contingency," the president has taken occasion to set forth the importance he attaches to the London agreement in a letter replying to critics of cruiser postponement action, by Paul V. McNutt, national commander of the American Legion.

## WESTERN PORT IS LEADING IN GRAIN SHIPMENTS

Ottawa.—Vancouver leads the country in grain export with a volume of 54,233,652 bushels passing through the port up to the end of the first six months of the calendar year, commencing June 1, according to figures compiled by the harbor commissioners for the port. Montreal exported 43,549,140; Saint John, 22,622,984, and Quebec, 3,587,273 bushels of grain. No exports of this commodity passed through St. John in May or June, the opening of navigation resulting in a transference of that business to Montreal, whose figures for the year begin with the month of May.

The volume for Halifax is not available, but is known to be considerably greater than last year. Grain from the United States furnished more than fifty per cent. of St. John's exports, American exporters shipping 12,281,399 bushels against 10,241,054 bushels Canadian grain. This quantity of the American commodity was greater in the first four months of the current year than in the whole of 1928.

Last calendar year Montreal shipped 211,265,379 bushels, of which 148,599,958 was Canadian grain and 62,665,421 American. Vancouver shipped 97,250,548 bushels, all Canadian grain. Vancouver's exports increased by 53,233,521 bushels over 1927 and Montreal's by 16,947,468 bushels.

## To Locate Beacon Station

Depot To Be Established For Airplane Pilots Near Brandon

Brandon.—Federal authorities have decided to locate a beacon station for the guidance of airplane pilots one and one-half miles east of Forrest, A. D. McLean, of Ottawa, and C. Taylor, of Regina, members of the federal aviation board, concluded the preliminary arrangements here this week. Two men are to be stationed at the depot, one for day and the other for night duty. It is understood that the closest beacon station to the west will be Broadview.

## HEADS ONTARIO MASONS

C. R. McKeown, of Toronto, chairman of the Ontario Railway Board, who has been elected grand lodge warden of the Masonic Grand Lodge of Canada in the province of Ontario.

## Edmonton Judge Holds Court At Aklavik

Travels 2,000 Miles To Teach Eskimo He Broke The Law

Aklavik, N.W.T.—A verdict of guilty of manslaughter was returned in the case of Okchina, Eskimo, by a jury at Aklavik, recently, before Hon. Judge Dube, of Edmonton. The trial was held at Aklavik, in the Northwest Territories, with Judge and jury.

Okchina, the Bathurst Inlet Eskimo, was found guilty of murdering Okchuk, another Eskimo, in the fall of 1927.

The jury considered for two hours and brought in a verdict of manslaughter, through their foreman, Dr. A. Truesdel. Okchina was sentenced to one year's imprisonment at Herchel Island.

This is the end of this year's judicial party's journey to the north to bring to the Eskimos two thousand miles from Edmonton that British fair play and justice for which the British empire has fought throughout centuries.

## Making Secret Trip In Moth Airplane

Believe Machine Going North For Mineral Exploration Purposes

The Pas, Man.—A secret trip into the Northwest in a moth plane is underway with Capt. W. N. Sherlock, of Dominion Explorers' aerial staff, at the controls. The flyer hopped off from here for Lac La Ronge, in northern Saskatchewan. While the aviator refused to discuss his trip, it is stated in mining circles that the machine will be taken into the far North for mineral exploration purposes.

If successful, the venture will likely set a new Canadian record for light planes of the moth biplane type. Most of the country over which the machine is flying is remote from habitation and a forced landing enroute would place the pilot in grave danger.

## Canada's Consumption Of Gasoline Mounting

New Record Made Last Year With 475,000,000 Gallons

Montreal.—Canada consumed about 475,000,000 gallons of gasoline last year, according to an estimate made by The Financial Post. This is a record figure, and exceeds any previous year's consumption by from 20 to 25 per cent.

Five years from now Canadian consumption of gas will probably top the billion gallon mark, so rapidly is the consumption of this all-important product increasing. This year's consumption will probably be in the neighborhood of 570,000,000 gallons, for not only are automobile registrations increasing currently at 14 to 15 per cent. per year, but the use of tractors and gas-burning machinery on the farms; the increasing tourist traffic; a higher mileage per car and the introduction of aeroplanes, all have their part in swelling our annual gas bill. The increase is significant in view of the tremendous investment interest in the gasoline business.

## POOL PAYMENT OF FORTY MILLION ON 1928 CROP

Winnipeg.—Nearly 40,000,000 can be distributed as a second interim payment on wheat and coarse grains by the Canadian Wheat Pools. The basis of the wheat payment is 21½ cents per No. 1; 13½ cents on No. 1 Northern; 17 cents on No. 2; 17½ cents on No. 3; 22½ cents on No. 4; 16 cents on No. 5; 8 cents on No. 6, and 7½ cents on feed wheat. There is a wide range in the payments on other grades, varying from as high as 24 cents and 36 cents per bushel on one or two grades, down to 2 cents per bushel on the smallest parcels.

Interim payments on durum wheats are: No. 1 Amber Durum, 15½ cents; 16 cents on No. 2; 12 cents on No. 3; 13½ cents on No. 4; 14 cents on No. 5; 6½ cents on No. 6, and 14 cents per bushel on feed Amber Durum. Last year the Pools adopted a new policy of adjusting all spreads and making deductions for elevator and commercial reserves, carrying charges, and other expenses from the second interim payment, and this course has been followed this year. As a result, the final payment, which will be made at the end of the crop year, will be a flat payment on all grades.

In making the above announcement, E. B. Ramsay, general manager of the Canadian Wheat Pool, made the following statement regarding the interim payment on grade six and feed wheat.

"Pool members who delivered wheat of these grades will remember that when the reduction was made in the initial payment last fall, from one dollar to 85 cents per bushel a concession was made to members delivering the lower grades to meet a very difficult situation. A larger proportion of the price of their grain was paid than in former years; for while the drop in the initial payment on the top grades was 15 cents below the previous year's basis the drop on No. 6 and feed wheat was only five cents per bushel. Prices of the lower grades, therefore, did not depreciate from the previous year's prices in the initial payments, in the same proportion as did the higher grades, even in the face of the very heavy deliveries of these lower grades which the Pool received."

The first interim payment on the 1928 crop was made by the Wheat Pool on March 1, last, when a flat payment of 12 cents per bushel was made on grades one to feed, with the exception of grade No. 6, on which the payment was 10 cents per bushel.

An interim payment amounting to over two and a half million dollars is also being distributed by the Coarse Grains Pools of Manitoba and Saskatchewan. An interim payment of 15 cents per bushel on 2 C.W. oats brings the Pool payment to the grade to 85 cents per bushel, and 11½ cents payment on 3 C.W. oats brings the payment on that grade to 48½ cents per bushel. The interim payment on barley is 7½ cents per bushel, bringing the total to date on 3 C.W. barley up to 67½ cents. The interim payment on flax is 34 cents per bushel, No. 1 N.W., bringing the total to date up to \$1.96 per bushel. Interim payments on rye are 9 cents per bushel for No. 1 and 2 C.W., 9½ cents for No. 3 C.W., and 10 cents for No. 4 C.W. Earlier payments amounted to 82 cents per bushel for No. 1 and 2 C.W.

## LITTLE TROUBLE FROM ANTI-WAR DEMONSTRATIONS

London, England.—The anti-war demonstration sponsored by Communist organizations throughout the world, passed off peacefully and left large an impressive jail, forces of troops police in the capitals of Europe with little work on their hands.

The most serious disturbance reported was in Canton, China, where martial law was declared for the day after grenades had been thrown in a government factory.

Although such meetings as were held in European centers passed off quietly, for the most part under close police observation, there were scattered clashes with the authorities and several scores of persons were added to those already in jail.

Gathering under the slogan of "War Against War," Communists over the entire Soviet Union took part in the demonstrations, which also marked the 15th anniversary of Russia's entry into the world war. Hundreds of thousands of persons filled the streets of Moscow in long parades led by brass bands and numberless banners and floats.

Demonstrations on a large scale were held in Moscow, Leningrad, Kharkov and at other cities at which resolutions were passed declaring the danger of a new war and pledging support to the government's efforts in the cause of peace. A resolution passed at the Moscow gathering protested against the attitude of the British Government in the Anglo-Soviet negotiations."

France, whose Communists had made the most extensive preparations, enjoyed a comparatively untroubled gathering. About 900 Communists were arrested in the Paris area where about 20,000 troops were on guard at all public buildings and in the factory suburbs. Police raids continued late into the night.

Aeroplane flew over the city watching for demonstrations but only in the suburbs, where 100 workers at the Citroen plant rioted and fired on a tank car, was there trouble. The riot was quickly halted.

Andre Tardieu, minister of the interior, and Jean Chiappe, prefect of police, stated that the day was calm with only minor and isolated disturbances. Several attempts at sabotage at factories or trains in the provinces were halted by French gendarmes, and Parisian troops were sent to the provinces to stage a grand parade on the boulevards.

Clashes occurred in a number of German cities and 30 Communists were arrested in Berlin where two members of the police guard were slashed with knives.

## Will Check Liquor Runners

Ottawa To Ascertain Whether Canadians Engage In Traffic

Ottawa.—A check-up is to be made of the liquor running activities along the Canadian border for the department of national revenue to ascertain just what number, if any, engaged in the traffic are Canadians. This will be done to enable the government to reach a conclusion whether there is a sufficient number to make it worth while introducing legislation in the next session of parliament to prevent citizens of this country from obtaining clearances for liquor going to the United States.

The recent statement of Hon. W. D. Bailer, minister of national revenue, announced that if there was any considerable number, legislation to put them out of the business would be introduced.

## Two Killed By Explosion

Metal and Tank Blown 200 Feet Into Air

Tral, B.C.—Two men were killed almost instantly and a third injured when an acetylene gas tank exploded in the acetylene burner shop of the Consolidated Reduction plant here.

The explosion threw metal 200 feet into the air. The tank itself rose to that height and came crashing back through the roof of the gate house, doing damage there.

**Tax Receipts Larger**

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$56,035,317 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

The photograph here shows a scene at the new Canadian Legation in Tokyo, Japan, on last Dominion Day, when celebrations, its first public functions, were conducted in the grounds and the Canadian flag was officially raised for the first time in the Orient.

## Personal and Local

Wm. Machin is spending a holiday at Saunders Creek.

Mr. and Mrs. Alex Cornett and Melvin and Helen left on Saturday by auto on a two weeks vacation.

J. Houghton, Sid Short and others are enjoying a fishing trip in the hills. No address given.

Mr. and Mrs. A. Fyfe left Sunday morning for three weeks vacation to Vancouver and Victoria.

Mrs. J. Nash and children are spending a holiday at Grassano with the Estou family.

Miss Gladys Price returned on Wednesday from attending summer school at Edmonton.

C. J. Devine left on Saturday for an auto tour with a friend from Lethbridge, their destination being California.

Steve Danyluk's cottage is surrounded by a very nice garden, many varieties of flowers being in full bloom, making a pretty display.

Mr. and Mrs. Alan Brown of West Coleman left on Saturday on a motor trip, and will visit friends in Edmonton.

Elia Thom and her brother Ver non went to Vancouver last week for a holiday. Their father left on Monday for a holiday.

The forestry patrol plane from Hing River on Tuesday gave the people of Coleman and Blairmore a thrill. It was flying so low that it appeared as if it would hit the rooftops. One lady thought it was going to tear down her clothes line.

Mrs. C. J. Devine and children of Coleman, and her mother, Mrs. J. Collins of Parkside, Sask., are spending a holiday in the city and are residing at the home of Mrs. Gordon Reber.—Lethbridge Herald.

Frank Calli went to Creston on Wednesday to arrange for the leasing of his fine fruit farm, his business here demanding most of his time. Many improvements have been made at the Palm Confectionery since he resumed possession early this year, and there has been a steady increase in business.

Principal and Mrs. Munro McLeod and daughter of Canmore motored down this week to visit Dr. D. A. McLeod and parents.

Nels Nelson of Midnapore visited Mr. and Mrs. Nielsen and drove on Saturday to Waterton Lakes, their daughter Eleanor accompanying them.

Someone has found that telephone conversations for business contain very few unnecessary words. Like everything else that costs money, it is used sparingly. Ordinary conversation costs nothing—that's why so many become tired of hearing other's talk.

The garden at Mr. and Mrs. F. G. Graham's house is indeed very attractive, and shows how surroundings can be improved in spite of many handicaps. Blooming plants and nicely trimmed patches of lawn right in the centre of the town demonstrate how an arid spot can be transformed. It serves to demonstrate what might be done by individual and concerted effort to beautify the town.

Mrs. Lexa Hall and daughter Anne left on Sunday to live in Calgary, after many years residence here. Their house has been leased by Mr. Dibble of Coleman Garage, whose family moved in last week.

R. C. McKnight, of London, Ont., general manager of the Northern Life Assurance Co., and Guy W. Johnson, agency manager, of Calgary, visited their local agent, Herb Snowden, on Monday, and were well pleased with the business being done by the company here.

### After Seventeen Years

P. W. D. Stoppford, acting manager in the Bank of Commerce during the vacation of Mr. Rippon, received his initiation into Canadian banking business in Coleman branch seventeen years ago, when he arrived from Ireland. He found some familiar faces here that he knew in those days, and notes a change for the better in the appearance of the town. In those days The Journal was published by a Mr. Norman, who is now in Vancouver.

## Here and There

(369)  
Locomotive Number 5900, one of a fleet of twenty monster oil-burning engines for use by the Canadian Pacific Railway on passenger and freight service in the mountains of British Columbia, has been released from the Montreal Locomotive Works and was on display in the Windsor Street Station in Montreal, recently. It was viewed by a constant stream of spectators all day, who admired its 98 feet of length, its huge proportions and its generally handsome appearance. This locomotive is the greatest in the British Empire.

The total number of dairy factories in operation last year in Canada was 2,385, comprising 1,255 creameries, 1,293 cheese factories, 288 combined butter and cheese factories, and 29 condenseries.

The Royal York Hotel, Toronto, was a blaze of color at the recent rose show held there in July. The blooms ranged from the pure white of large dimensions and the smaller varieties to the vivid red of American Beauties and others. The ball room of the Royal York was filled with them at the Ontario Rose Society show. The display gave birth to the project of having the most beautiful rose garden in the world laid out on the Canadian-American border and a committee was appointed to consider the plan and to settle final details at a meeting at the Royal York next month.

Announcement has been made that Americans and Canadians will join in travelling to the World's Poultry Congress to be held in England in 1930. Delegates will meet at Montreal and will travel via St. Lawrence route overseas. It is expected that nearly 1,000 delegates will make the trip.

Canada's wool crop, like the grain harvest, moves across the country in a great wave, not being a simultaneous operation in all provinces. It begins in the sheltered valleys of British Columbia and moves steadily across the Prairies. The shearing is at its height early in June and is about completed by the end of that month. The crop ranges from 15 to 24 million lbs. yearly and is marketed largely through the Canadian Co-operative Wool Growers.

### CLASSIFIED ADVERTISEMENTS

FOR SALE—A few milk cows. Apply to E. Gudmundson, Box 84. 50-1 p.
